TECHNOLOGIES

Proficient at

- HTML
- CSS
- Node
- Express
- Git
- MVC Architecture
- REST APIs Architecture
- Client Side Javascript
- HTML Templating (Handlebars)
- Third party software (AWS, ChatGPT, Google Maps)
- MongoDB

Experience With

- ReactJS
- MYSQL
- GraphQL (Apollo)
- PWA
- Webpack
- Caching
- Heroku
- Service Workers
- jQuery

Exposed to

- C #
- .Net
- Python
- C++

PROFILE

I am currently seeking a full time job as a junior software developer, to help me build on my current knowledge and understanding in this field. I have experience through a coding bootcamp that I have completed from the University of Birmingham.

I am a hard-working individual and I give 100% effort in everything I do. I am eager to learn new things. I am a great team player and work well using my own initiative.

University Of Birmingham Coding Bootcamp — March - Sept 2023

I have done a 24 week full stack web development bootcamp at the University Of Birmingham. I completed 23 modules and 3 team projects with various different web technologies that ranged from simple HTML/CSS websites to full stack GraphQL, React applications.

In each project I had to work with 3-4 other team members to produce an application based on requirements outlined by the course leader. In these projects I was nominated team leader. Being a team leader involved figuring out team members abilities and then delegating tasks based upon these abilities while also contributing to the project myself.

Grade: 100% A+

Notable Modules and Projects

- Module 1: HTML, CSS and Git
- Module 3: Javascript
- Module 5: Third party apis
- Module 7: Project 1 (ChatGPT and Google Maps Integration)
- Module 9: Node
- Module 12: SQL
- Module 15: Project 2 (Full stack Blog with AWS integration)
- Module 18: NoSQL (MongoDB)
- Module 20: React
- Module 23: Project 3 (Social media platform for developers)
