Address: 3 Wexford Close, Milking Bank, Dudley DY1 2UL

Profile

I am currently looking for a trainee/Junior Software Engineer position. I have finished a UAL course for Computer Games Design at Dudley college and have gained a lot of teamwork skills through my time there. I have carried on the course to do a HND so that I can move on to gaining myself a Bachelor. I mainly have used C++ to create projects for Games using software like Unreal Engine and have made multiple projects, in addition I have used C# to create simple apps like a calculator and lastly used Python in my Secondary school years to create a card game.

I finished my GCSE exams in June 2019 and in August 2019 I went on a government back scheme called NCS which helped me acquire several skills particularly related to working within a team. This was over a 3-week period in which different tasks and projects were given to us to overcome. I am a fast learning individual that is up to any task and will develop at high speeds. I can work as a team or as an individual. In addition, I am reliable as I will communicate and hit deadlines.

Work experience

Express and Star
June 2018 — 1 week

Advertisement Designer

My objective for the week was to learn how to create advertisements using both Adobe InDesign and Photoshop. During the week I learned from professionals who create advertisements for local and national businesses daily. By the end of the week, I felt I had learned a lot and had acquired several skills enabling me to use the applications well, creating several advertisements and enhancing photos. I also spent a day with Press Computers Systems which are located within the Express & Star offices learning the basics and principles of computer programming which I found very interesting.

Wetherspoons
July 2021 — Present

Bar Associate

I have gained a lot of knowledge of the business while doing Bar and floor. I have used the tills relentlessly, so I can quickly move and deal with many customers throughout the day. I have a lot of customer service knowledge. To show my improvements I have been given employee of the month and have only been there for a short period and going up against people who have worked there for years. Furthermore, I am very good at handling multiple tasks, taking orders from multiple customers and remembering their preferences.

Code Languages

Proficient:

- C++

Novice:

- Python
- C#

Education

Ellowes Hall
2014 — 2019

GCSE Grades
- English Language – 6 (B)
- English Literature – 5 (C)
